

# Quest Migration Suite for Exchange

## ZEROIMPACT MIGRATION TO EXCHANGE 2000/2003

- Supports thorough analysis and planning features
- Delivers comprehensive solutions offering
- Allows complete consolidation
- Provides true coexistence throughout the migration processes
- Automates user profile reconfiguration
- Analyzes user e-mail traffic and plans migration
- Supports various migration scenarios:
  - 5.5 – 200x intra-org
  - 5.5 – 200x inter-org
  - 200x - 200x inter-org
- Reduces number of Exchange organizations, sites, and servers
- Supports synchronization of the old and new environments
- Updates Outlook profiles remotely

E-mail use continues to increase at astonishing rates, and organizations are increasingly more dependent on it to operate successfully. Even one hour without e-mail capability can cripple an entire organization. As you prepare to migrate your Exchange environment, it is imperative that you arm yourself with a powerful arsenal of tools to ensure a transparent, expertly-managed migration process. Quest Software is here to help.

Quest® Migration Suite for Exchange is a ZeroIMPACT™ solution for planning and executing your migration projects to Exchange 2000/2003 from Exchange 5.5, 2000 or 2003. This powerful solution helps to ensure a seamless migration process, providing a centralized place for project management. Equipped with robust analysis tools and reporting mechanisms, the Migration Suite comprehensively meets your Exchange migration needs.

### MessageStats

*Analyze and report on your Exchange environment*

MessageStats™ provides the power Exchange administrators need to effectively analyze and understand their Exchange environment. It also delivers the information business users require to make informed, intelligent decisions. MessageStats measures e-mail traffic, reports policy compliance, defends service level agreements, ensures sufficient capacity, and prepares for Exchange migrations. MessageStats offers high-level, business-focused reports with graphics, metrics, interactivity, drilldown capabilities and even custom reports.

### Spotlight on Exchange

*Diagnostics and resolution for Exchange Server*

Spotlight® on Exchange helps you detect problems in your Exchange environment, accurately locate the root cause, and resolve the problems from a single, easy-to-use interface. While displaying the real-time activity of all Exchange components in a single interface, Spotlight's powerful features provide you with a robust and informed troubleshooting solution.

### Exchange Migration Wizard

*Effectively address migration challenges and ensure ZeroIMPACT on users*

Exchange Migration Wizard™ is an award-winning migration application for transitioning Exchange 5.5-based environments to new or existing Exchange2000/2003 environments. Exchange Migration Wizard performs a gradual, unattended migration with a special focus on real-time synchronization. Two-way, real-time synchronization of administrative changes means you only need to make changes once; saving you time and increasing directory accuracy.

Migration Wizard enables you to automate Outlook client profile updates. This feature makes the final step of the migration invisible to users, which in turn means they'll need no assistance from the help desk. While supporting true coexistence during the migration process, this product ensures that users will continue to exchange messages, view calendars, and access synchronized public folders, regardless of their mailbox location.

ZEROIMPACT MIGRATION TO EXCHANGE 2000/2003

## Migration Manager for Exchange

*ZeroIMPACT migration from Exchange 2000/2003 to Exchange 2000/2003 with coexistence*

Migration Manager for Exchange empowers you to restructure or consolidate your Exchange 2000/2003 organization with confidence. By synchronizing Active Directory and Exchange data, including public folders, calendar information, and mailbox data, Migration Manager delivers true coexistence. In addition, it automatically updates your users' Outlook profiles, helping to ensure a seamless, efficient Exchange migration. Migration Manager gives you complete control over your migration, secures your migration process, helps to prevent errors, and ensures that administration resources are used where most effective.

Quest Migration Suite for Exchange is one offering in our Solutions for Infrastructure Management, featuring applications to manage Active Directory, Exchange and Windows.
